

Bug Report

Bug ID: BUG-001

Title: Login button is not working after entering valid credentials

Module: Login

Severity: Critical

Priority: High

Environment:

- OS: Windows 10/11
- Browser: Chrome (latest version)
- Application: Web Application

Precondition:

- User has a valid username and password.
- Application is accessible.

Steps to Reproduce:

1. Open the application.
2. Enter a valid username and password.
3. Click the **Login** button.
4. Observe the behavior.

Expected Result:

- The user should be successfully logged in and redirected to the dashboard or home page.

Actual Result:

- Clicking the **Login** button does not perform any action. The user remains on the login page even after entering valid credentials.

Status: New

Assigned To: Kunal Maheshwari

Reported By: Raghvendra BN

Attachments:

- Screenshot (if available)

- Browser console logs (if available)
 - Screen recording (optional)
-

Possible Reasons

- Login button click event is not triggered.
- JavaScript error preventing form submission.
- Backend authentication service is unavailable.
- API request is failing.
- Form validation is incorrectly blocking submission.
