

Project Name: Customer Onboarding(Online AKYC)	
Module Name: Aadhar verification	Date Updated: 09-07-2026
Last Build Tested:	Reviewed By: Raghavendra BN
Run No:	Executed By: Kunal Maheshwari
Run Date: 09-07-2026	
Test Objectives:	
Test Setup: Microsoft Edge Browser on Window 11	

Req_Id	Test_Case_ID	Test_Case_Description	Test Steps	Test_Data	Expected_Result	Actual_Result	Status
RQ_01	TC_AKYC_001	Verify successful Aadhaar OTP-based e-KYC verification	Given the applicant is on the Aadhaar Verification page. When the applicant enters a valid Aadhaar number. And clicks Generate OTP . And enters the valid OTP. Then the Aadhaar should be verified successfully via UIDAI. And the applicant should proceed to the next step.	Valid Aadhaar, Valid OTP	Aadhaar verification should be successful.		Not Executed
RQ_01	TC_AKYC_002	Verify validation for invalid Aadhaar number	Given the applicant is on the Aadhaar Verification page. When the applicant enters an invalid Aadhaar number. And clicks Verify . Then the system should display "Invalid Aadhaar Number". And the applicant should not proceed further.	Invalid Aadhaar	Appropriate validation message should be displayed.		Not Executed
RQ_01	TC_AKYC_003	Verify incorrect OTP validation	Given the applicant has generated an OTP. When the applicant enters an incorrect OTP. And clicks Verify . Then the system should display "Invalid OTP". And allow the applicant to retry.	Invalid OTP	Error message should be displayed.		Not Executed
RQ_01	TC_AKYC_004	Verify expired OTP handling	Given an OTP has been generated. When the OTP expires before submission. And the applicant enters the expired OTP. Then the system should display "OTP Expired". And provide the Resend OTP option.	Expired OTP	OTP expiry message should be displayed.		Not Executed
RQ_02	TC_AKYC_005	Verify successful PAN verification	Given Aadhaar verification is completed successfully. When the applicant enters a valid PAN number. And submits the PAN details. Then the system should validate the PAN. And compare it with Aadhaar details successfully.	Valid PAN	PAN verification should be successful.		Not Executed
RQ_02	TC_AKYC_006	Verify invalid PAN format	Given the applicant is on the PAN Verification page. When the applicant enters an invalid PAN format. And submits the details. Then the system should display "Invalid PAN Format".	Invalid PAN Format	Validation message should appear.		Not Executed

RQ_02	TC_AKYC_007	Verify PAN not found	Given the applicant is on the PAN Verification page. When the applicant enters a PAN that is not available in the database. Then the system should display PAN verification failed.	Non-existing PAN	PAN verification should fail.		Not Executed
RQ_03	TC_AKYC_008	Verify successful Aadhaar-PAN name match	Given Aadhaar and PAN are verified. When the system compares both names. Then the names should match within the acceptable threshold. And verification should complete successfully.	Matching Details	Verification should succeed.		Not Executed
RQ_03	TC_AKYC_009	Verify manual verification for name mismatch	Given Aadhaar and PAN are verified. When the system detects a name mismatch beyond the acceptable threshold. Then the application should be flagged for manual verification. And the application should not be rejected automatically.	Name Mismatch	Manual verification should be initiated.		Not Executed
RQ_04	TC_AKYC_010	Verify Aadhaar consent before e-KYC	Given the applicant is on the consent page. When the applicant selects the consent checkbox. And verifies consent using OTP. Then the system should fetch Aadhaar details from UIDAI. And continue the verification process.	Consent Given	Aadhaar details should be fetched successfully.		Not Executed
RQ_04	TC_AKYC_011	Verify e-KYC without consent	Given the applicant is on the consent page. When the applicant does not provide consent. And clicks Continue . Then the system should prevent Aadhaar verification. And display a mandatory consent message.	Consent Not Given	Applicant should not proceed.		Not Executed
RQ_05	TC_AKYC_012	Verify UIDAI service unavailability	Given the UIDAI service is unavailable. When the applicant attempts Aadhaar verification. Then the system should_
